

You don't get second chances on missions to Mars.

That's why NASA chose a protective TurtleSkin system to prevent punctures to the crash bags for their Mars landings of Pathfinder in 1997, as well as the Mars Spirit & Opportunity in January 2004.

TurtleSkin products are manufactured by Warwick Mills, the world's leader in puncture- and cut-resistant fabrics. Our patented materials are used in a variety of protective apparel, including gloves for police officers to prevent needlesticks, flame & cut-resistant fabric for firefighters, and protective suits for high pressure water jetting. From the sails on America's Cup racing yachts to the blimps flying over the Super Bowl, you'll find Warwick's products where quality, durability, and high performance matter most.

Snake and Thorn Protection Available

The TurtleSkin Advantage

Best Protection from Snakes

Most snake garments are heavy, stiff, and bulky. TurtleSkin SnakeArmor's 6 oz fabric is one-third the weight of other systems, yet tested to repel even large rattlesnakes.

Patented Puncture Protection

TurtleSkin SnakeArmor's patented technology produces the tightest weave ever made with high-strength fibers. Its weave is locked so tightly, snake fangs can't slip past, while TurtleSkin's tough ballistic fibers resist breaking. This results in an extremely protective fabric that is lightweight and flexible.

US Patents 5,565,264 and 5,837,623, as well as other patents pending.

Snake Fang Magnified over TurtleSkin Fabric

Tested with Live Snakes

The TurtleSkin SnakeArmor system was tested with live diamondback rattlesnakes, and successfully repelled their strikes and venom. In addition, this system stopped a simulated snake strike of paired 0.05" diameter needles at 2.63 joules, and 0.042" diameter needle at 2.37 pounds with a penetration limit of 0.03".

Go to www.turtleskin.com to see a video of the live snake testing.

Protective Snake Pants

Never has a softer pair of pants been designed for snake protection. Soft 100% cotton shell with a TurtleSkin system built into the entire bottom from the knee down. Available in khaki or sage green.

Sizes: 32" - 42" in short, regular, or long.

Below the Knee Protection Snake Chaps

Made from a soft, outer shell with 16 inches of TurtleSkin protection from the knee down. Lightweight outer shell is water resistant and breathable. Available in khaki and sage green.

Sizes: regular or husky, in short, regular, or long.

Total Protection Snake Chaps

Full protection from snakes and thorns for the entire leg, from hip to ankle, making it the most protective chap made. This lightweight chap will keep you cool and dry. Available in khaki and sage green.

Sizes: regular or husky, in short, regular, or long.

Reversible Snake Gaiters

This reversible gaiter is designed so you can wear either the natural camo pattern or the lighter khaki. Simply zip up the back and cinch the elastic top for a snug fit. Available in sage, camo, and khaki combinations.

Sizes: regular or husky.
